EXECUTIVE SUMMARY:

Ruogu “Reanna” Fang, M.S., Ph.D. is a tenured Associate Professor and Pruitt Family Endowed Faculty Fellow in the J. Crayton Pruitt Family Department of Biomedical Engineering at the University of Florida. She is the Director of the Smart Medical Informatics Learning and Evaluation (SMILE) Lab, Associate Director of the Intelligent Critical Care Center (IC³), and affiliated faculty of Electrical and Computer Engineering, Computer and Information Science and Engineering, Radiology, and Center for Cognitive Aging and Memory in McKnight Brain Institute.

Dr. Fang has established an internationally recognized research and educational program focused on Medical Artificial Intelligence (AI) for diagnosis and intervention of brain disorders, with a particular emphasis on neurodegenerative diseases. Her research themes are artificial intelligence (AI)-empowered precision brain health and brain/bio-inspired AI. Her transdisciplinary research impact has spanned from creating a new modularized machine learning system for early diagnosis of neurodegenerative diseases using novel imaging to individualized intervention using non-invasive brain stimulation to prevent dementia. Her lab has been continuously funded by NSF, NIH, AFRL, and industry since 2016. Dr. Fang serves as the Principal Investigator (PI) and Co-Investigator on 35 funded grants, among which she served as PI on 14 grants, with a total funding of \$51.4 M, and PI of \$6.1 M. She has nine issued patents and one pending. She was selected as the Rising Stars by the Academy of Science, Engineering, and Medicine of Florida (ASEMFL), the Inaugural recipient of the Robin Sidhu Memorial Young Scientist Award from the Society of Brain Mapping and Therapeutics and received the Best Paper Award from the IEEE International Conference on Image Processing, UF Inaugural Artificial Intelligence (AI) Course Award, University of Florida Herbert Wertheim College of Engineering Faculty Award for Excellence in Innovation, UF BME Faculty Research Excellence Award, among others. She has 140+ peer-reviewed publications, including highly respected journals of *Lancet*, *PNAS*, *npj*, *Medical Image Analysis*, *IEEE Transaction on Medical Imaging*, that are well cited (h-index = 24, I₁₀-index=41, 3500+ citations, Google Scholar) and frequently featured by international major media (e.g., *Forbes Magazine*, *The Washington Post*, *ABC*, *National Geography*, *The Hindu*, *EveSmart*, and *Eminetra*).

She is the Associate Director of the Intelligence Critical Care Center (IC³) aiming to transform healthcare via Medical AI (MAI) through multi-disciplinary collaboration. The IC³ Center is dedicated to achieving several core mission goals: (a) advancing research in AI-empowered diagnostics in a way that is ethical and equitable; (b) nurturing a new generation of diverse transdisciplinary MAI researchers through education and training; (c) establishing national and international standards for multicenter data generation initiatives and the sharing of publicly available datasets and MAI platforms; and (d) promoting entrepreneurship, industry partnerships, and advocacy initiatives in the field of MAI.

Dr. Fang is passionate about educating the next generation of transdisciplinary biomedical researchers from diverse backgrounds, especially underrepresented and marginal communities. She is the inaugural chair of the Public Engagement and Outreach Committee and was instrumental in translating the Shepard Broad Foundation Community Outreach Fund into society-benefiting actions. Dr. Fang contributes to building the next generation of leaders in medical AI by teaching computer applications in BME. She has introduced new, high-value educational pedagogies in her undergraduate and graduate classrooms during the pandemic which have led to *the best offering* of these classes in terms of student evaluation in the history of the BME department. She also created a new AI course series “Medical Artificial Intelligence (MAI)” and received the inaugural AI Course Award from UF. In her laboratory, she has mentored 3 Postdoc Associates, 13 doctoral and 20+ master graduate students, and over 60 undergraduates. She is the President of Women in MICCAI and a mentor of AnitaBorg.org.

Dr. Fang has enthusiastically promoted the emerging field of Medical AI while faithfully serving the profession. Dr. Fang currently serves as the Associate Editor of *Medical Image Analysis*, serves as the inaugural Topic Editor of “Women in Brain Imaging and Brain Stimulation” in *Frontiers of Human Neuroscience*, and organized a special issue in *Computerized Medical Imaging and Graphics*. She chaired 10+ workshops, sessions, and tracks at international conferences. Dr. Fang has regularly served on NIH study sections and NSF panels (8+ years, 90+ grant proposals), and reviewed for 30+ journals (100+ manuscripts/books).
